

CLIMATE AND CLEAN AIR COALITION
TO REDUCE SHORT-LIVED CLIMATE POLLUTANTS

Evaluation of City Assessment Process

Andrea Stowell, CCI
Tom Frankiewicz, US EPA
March 11, 2013

Purpose

- Gather data to characterize waste sector
- Put data in context through site visits and “on the ground” observation
- Identify stakeholders
- Build support and assess political will
- Identify potential projects

Accra, Ghana

- Data Gathering: worked with city to initiate data gathering – supplemented through internet/journal research
- Scoping Mission: gathered additional data, and “ground truthed” based on observation, meetings with stakeholders, and AMA
- Presentation to Management: developed presentation of findings, initial priorities in cooperation with technical staff to co-present to AMA management

Lagos, Nigeria

- Alternative approach based advanced on project development timeline
- Goal: evaluate whether a process was used to minimize risk to potential financiers and catalyze dialogue on identifying a replacement for CERs
- Conducted interviews, reviewed existing documents and assembled chronological account of all steps taken to demonstrate Project's financial viability
- Identified next steps

Questions

- What was your city's role in facilitating the city assessment?
- Did the city assessment process help you identify any new project opportunities for SLCP reductions or ideas for improving upon existing projects?
- What are your thoughts/impressions of how the city assessment was conducted? What could be improved about process?
- What would you like to see come out of the city assessment process?
- How can experience to date be turned into improving process, forms used, deliverables?
